OCT 8 1959

I can certainly understand what you mean.
How do you suggest we get together? For the
forthcoming meeting?

I can reach Philadelphia (by train from
Princeton) at a moderate hour Thursday
evening, 10/22, if this would be propitious.
A propos SSB 96, Westix would have been
pleased to have representatives from NASA + NSF.
Dr. Keithel (Molecular Biology) at NSF expressed
considerable interest but found a certain lack of
enthusiasm at the front office. Has NSF pro-
posed any representations to biological activities?

~~Can you give us any details of the time +
place of the SSB meeting? Mike Villard & I were
both surprised to have learned from Derbyshire
that we were going to Philadelphia.
Notice just received. Expect to arrive
6-8 PM by rail.~~

J. L.
